

# Information Communication Technology

Technology education aims to provide students with the understandings and knowledge needed to actively and responsibly participate in an increasingly technological society.

Year 9 Computer Education aims to provide students with a broad-based education comprising of general and vocational components, as well as preparing them for citizenship, further education, employment and lifelong learning.

Year 10 students studying Business Studies and Information and Communication Technologies will engage in enterprises which focus on production, marketing, sales, finance and administration and develop an understanding of the businesses which utilise media and multimedia for daily business operations and promotions.

Business Communication and Technologies offers students who wish to pursue a career in corporate management, business administration, events administration, workplace health and safety or tertiary study in the fields of business, business management, Accounting, events management and human resources with Business and Information Technology giving students a firm understanding of how a business operates on a day to day basis and an understanding of how information technology is used in the workplace.

The computer based subjects of Information Processing Technology and Information Technology Systems provide students who wish to pursue a career in Information Technology with exposure to a variety of intellectual challenges involving distinctive approaches to problem solving while developing a range of associated practical skills.
